E. Programming Service Charges in Community

In the following, the "basic cable service tier" or **BST** is the service tier that includes the retransmission of over-the-air broadcast signals and may include a few satellite or regional channels. A "cable programming service tier" or **CPST** is any other tier containing programming other than that on the BST, pay-per-channel, or pay-per-view. **CPST1** refers to the major CPST and typically meets two criteria: It has the most channels and most subscribers among the CPST tiers (if more than one CPST is offered). Sometimes a "mini-tier" with considerably fewer channels has the most subscribers among the CPSTs. This mini-tier is considered **CPST2**, whether or not it has the most subscribers.
